SIGNUM promotional material

Introduction

In June 2004, the 3SB1 range of command devices will be retired. SIGNUM from Siemens will replace it.

The background

Our 3SB1 production facilities were designed in the late 70's and hence without access to much of the technology used on our SIGNUM lines. Whilst still excellent in terms of product quality, it's fair to say they are now feeling their age in terms of speed and efficiency. In addition, recent sales of 3SB1 have declined (due in part to both heightened market requirements and the continuing success of SIGNUM). Correspondingly, this has reduced the requirements for bulk production of 3SB1.

Both factors have increased 3SB1's cost per piece, which we offset only partially with a list price increase (November 2002). In addition, lead times will increase as stock levels are reduced to more appropriate levels for current worldwide sales. It should be made very clear that Siemens are fully committed to excellence, not only in terms of product quality but also logistics service and value for money. Luckily we have all these points covered by SIGNUM.

Therefore the decision pretty much makes itself: Siemens will not continue to produce the 3SB1 range if it cannot meet customer expectations in terms of technology, price or delivery. We will concentrate on promoting SIGNUM.

Three main action points

- As soon as possible, inform all customers using 3SB1 for new build (enclosed: a sample letter).
- Convince these customers to specify SIGNUM command devices instead (enclosed: sales arguments for convincing OEMs to change and extensive conversion lists to do all the donkeywork).
- Run down 3SB1 wholesale stocks naturally. Increase SIGNUM wholesale stock accordingly. N.B. Increases in 3SB1 stocks over this period (calendar year 2003) are at the wholesaler's own risk.

Three points for consideration

- The points made in "The background" (above) are common sense, but they are for your information only. Most customers will be (at best) disinterested to hear our reasoning and (at worst) we could come off as whiny. So please take care that it is not used, abused and generally twisted into something it isn't.
- Take care with the conversion lists; especially items listed "No equivalent". There are investment plans underway to fill these niche gaps with new SIGNUM devices (announcements soon) and we are analysing our sales from recent years (to identify customers who currently buy these products). If you believe that one of your customers falls into this category, we need to agree a suitable action plan. Please contact us.
- We must ensure that we act appropriately with all 3SB1 customers. Obviously we must move to retain their command device turnover, but people have long memories and we must certainly retain their goodwill.

Additional opportunity

In terms of age, technology and specifications, the XB2 range from Telemecanique is very similar to 3SB1. So most of the customer benefits seen by converting 3SB1 to SIGNUM also apply to converting any remaining XB2 customers out there. The added benefit to Siemens and our distribution partners is that this is new turnover! For conversion lists and other material relating to this, please contact us and we will be delighted to assist.

Yours faithfully,
(for and on behalf of Siemens Automation & Drives)

Benefits from upgrading to SIGNUM from Siemens

1. Outstanding quality, as per usual

If you have been a Siemens customer for any length of time, you already appreciate products that simply get on with the job. So you'll be pleased to hear that SIGNUM from Siemens meets and exceeds the standards set by 3SB1 in all key categories.

Of particular note are the high IP ratings that can be achieved without boots. SIGNUM Metal has been designed to withstand not only high-pressure water jets but also short-term immersion in water. So if your panels or machinery are used in wet areas, SIGNUM Metal is the belt and braces product on today's market.

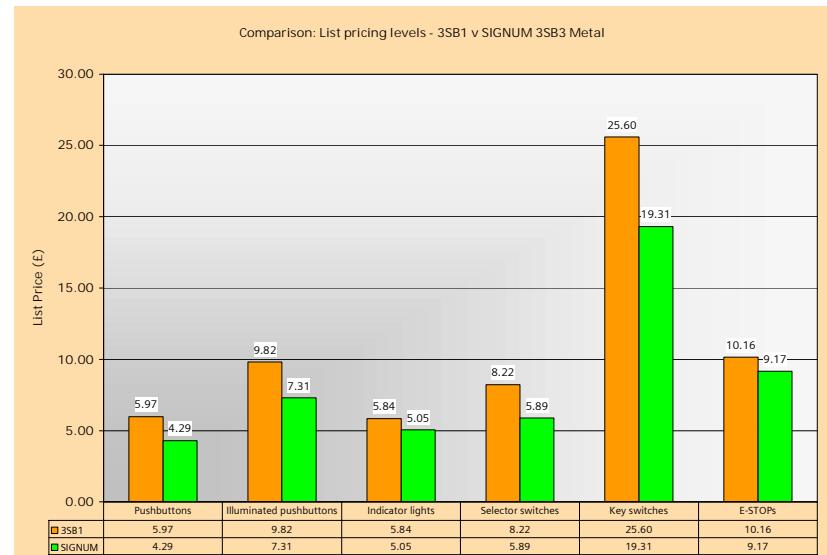

Specification	3SB1	SIGNUM
Mechanical life (1000 ops / hr)	10×10^6	10×10^6
Electrical life (AC-15)	10×10^6	10×10^6
Shock (11ms ½-sine: IEC60068 pt2-27)	$\leq 50\text{g}$	$\leq 50\text{g}$
Ambient temperature	-25 to +70°C	-25 to +70°C
Ingress protection (without boots)	IP65	Plastic: IP66 Metal: IP66/IP67

2. Pay less and get more

No command device program offers better value for money than SIGNUM. Not only have we designed in cost-saving features and class-leading technology, we have honed our production facilities to ensure that they are amongst the most efficient around. That cost saving is passed on to our customers, as shown by our competitive pricing.

On common items (see chart), you will enjoy material cost savings of between 11% and 40% on your current terms for 3SB1 products.

For a quote based on your specific usage, please contact your local representative.

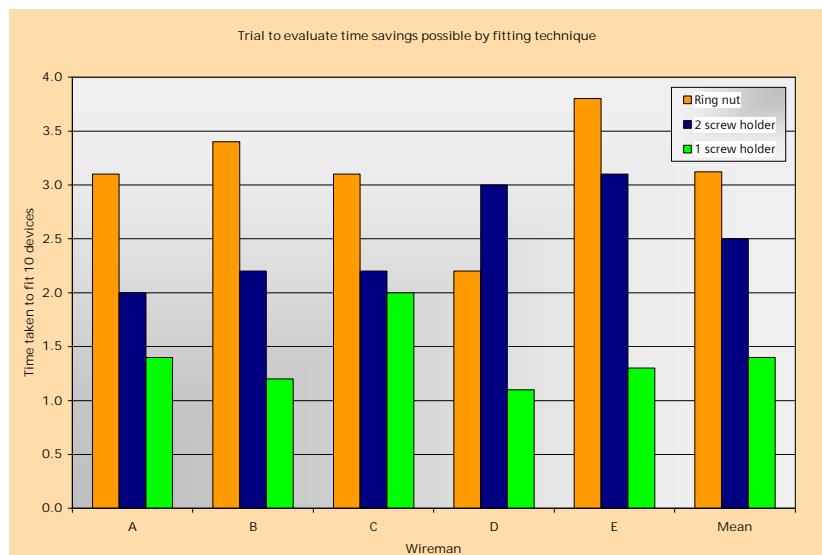

3. Cost savings out of the box

We conducted a time trial to evaluate whether it was faster to fit ring nut devices, two-screw holders (like 3SB1) or SIGNUM: the results are clear.

One of the key benefits offered by SIGNUM is its unique, patented holder. The single-screw cam mechanism can achieve over 40% timesavings in comparison to fitting 3SB1 with its two-screw holder.

Putting it another way, you can fit five SIGNUM devices in the time it takes to fit three from the 3SB1 range. So you don't have to be fitting 100s of pushbuttons before you start to notice appreciable savings.

4. Future-proof your systems

Siemens are the undisputed market leader in Actuator-Sensor Interface (AS-i), Europe's most popular low-level open communications network. We also offer the widest range in comms-capable command devices, based on standard SIGNUM heads.

Even if you don't currently have a requirement for intelligent control panels, with SIGNUM you can easily upgrade your systems at a later date, just by replacing the contact blocks and lamp holders.

So by specifying SIGNUM, your options are kept open.

Some advantages of AS-i

- Reduced cabling costs
- Even E-STOPS can be networked (AS-i Safe)
- Reduced control cabinets size
- Reduced commissioning time
- Easy fault finding: diagnostic data via the bus
- Modular structure: easy to expand on the fly

5. Looking good for your money

Super-bright LED technology has been around for some time now, but you may be surprised at how far the price has reduced and how much more you get.

The prime advantage is one that isn't easy to put a price on: it simply looks better. All colours of illuminated devices look far more vibrant, meaning signals are seen more clearly (and even in high ambient light conditions).

Reduce a machine's cost of ownership with LEDs

- Save 60% on maintenance costs: 100,000 hr life
- Save 80% on running costs: 13kWh over LED life
- Save on material costs: no need for lamp test
- Save on weight: no need for trannie lamps
- A LED pays for itself in less than a year

6. More savings behind the door

SIGNUM is one of the few command device ranges that offers Cage Clamp™ contact blocks (as well as the more traditional screw clamps). If you're familiar with the Wago GmbH design from terminal blocks, so are we! We integrate their original clamps into a wide range of our products, from SIRIUS Controlgear to SIGUARD Safety Products and SIDAC Transformers.

So if you're already using Wago terminals, you can save even more time by using SIGNUM as well.

Some advantages of Cage Clamp™ technology

- Save on preparation time: no need for ferrules
- Save on cabling time: >50% faster than screws
- Increase assembly reliability: no torque errors
- Save on maintenance: clamps vibrate tight
- Save on panel space: 30x30mm grids possible

The next step

Production of 3SB1 will stop in June 2004. We apologise for any inconvenience this may cause, but we trust that 18 months is a sufficient notice period for you to change your drawings or bills of material.

We also hope you will give strong consideration to replacing your current 3SB1 usage with the equivalent SIGNUM devices. We have a range of conversion aids (available electronically) to assist you.

Lists available via your local representative

- SIGNUM Plastic from 3SB1 Plastic
- SIGNUM Metal from 3SB1 Metal
- SIGNUM Metal from 3SB1 Plastic (treat yourself!)
- SIGNUM Metal from most leading suppliers
- Specific BOMs upon request

If you feel we can help you further in any respect, please contact either your local representative or myself.

Dear [Title] [Surname]

THE BAD NEWS

NOTICE OF PRODUCT OBSOLESCENCE: SIEMENS 3SB1 COMMAND DEVICES

As you currently buy 3SB1 pushbuttons and indicator lights, we must inform you that production of these devices will stop in June 2004. We sincerely apologise for any inconvenience that this may cause and we trust that 18 months is a sufficient notice period for you to change any affected drawings or bills of material.

THE GREAT NEWS

UPGRADE TO SIGNUM FROM SIEMENS AT NO EXTRA COST

Understandably you will want to consider your options before deciding on which command device range will be the “new face” of your control panels. If you haven’t already been introduced to SIGNUM from Siemens, Europe’s class-leading range of command devices, please take a few moments to browse these key facts.

- Save on material costs: equivalent devices at between 6% and 66% less †
- Save on installation costs: 40% faster to fit than 3SB1 (fit 5 in the time it took to fit 3)
- Save on cabling costs: blocks include Cage Clamp™ technology or upgrade to AS-i & AS-i Safe
- Save on hassle: what price continuity of supply with business partners you know and trust?
- Upgrade to a high-polish metal bezel (not metal coloured plastic) at no extra cost ‡

If you have any questions relating to either the obsolescence of 3SB1 or upgrading to SIGNUM, please contact either myself or Siemens Internal Sales (T: 0161 446 6400; E: CDtech@plcman.siemens.co.uk).

Yours sincerely,
(for and on behalf of [YourCompany]),

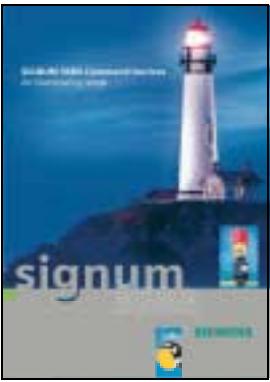

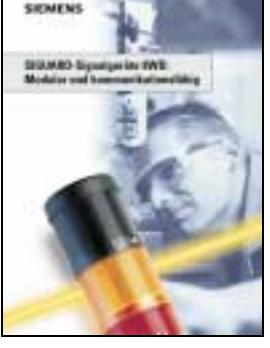

[YourSignature]

[YourCompany]

† Comparison made between 3SB1 and SIGNUM at November 2002 prices, at your current terms for Siemens Command Devices.
The specific savings you will experience will depend upon the specific mix of actuators and blocks that you purchase.

‡ Since their launch in 1999, SIGNUM Metal devices have had the same UK list price as the equivalent SIGNUM Plastic devices.

Core support material for SIGNUM Command Devices, stocked in DMS
